
(a) Layer-wise exponent
p
APU layer index (depth)
± std of p(z) within layer
p0
mean p (± seeds)
(b) Exponent distribution by depth
shallow
middle
deep
p(z)
(c) Channel-wise mean p (seed 0)
layer
channel
(d) Input dependence of the exponent
p(z)
input z
layer 0
layer 6
layer 11
(e) Learned f(z) (trained parameters)
identity
ReLU
layer 0
layer 6
layer 11
z
(f) Exponent variation during training (first/mid/last layer)
std of p(z) in layer
epoch
